The not-for-profit New York Astronomical Corporation was founded in 1968, and with it the Astronomical Society of New York was born. In the intervening 50 years, what has astronomy and astrophysics become? At this historic meeting, we explore the changes in the science over the decades, share the state of the art as practiced and advanced by the New York State astronomical community, and discuss the future of our field in the 50 years to come.

Organizing Committee

Aileen O'Donoghue (SLU), Charles Liu (CUNY CSI), Christina Lacey (Hofstra), Jeyhan Kartaltepe (RIT), Joseph Ribaldo (Utica), Mary Crone Odekon (Skidmore), Rebecca Koopmann (Union)

Invited Speakers
