

Venus will pass directly between the Earth and Sun, and will appear as a small dot in front of the Sun. This will not occur again until 2117!

JUNE 5

SUNY New Paltz Campus
Lecture Center

- Talk by Dr. Amy Forestell from 5-5:30PM
- Viewing with solar telescopes until sunset at 8PM
- Live internet streaming of the transit from 6-9PM

Never look at the Sun without special equipment!

Presented by SUNY New Paltz & the Mid-Hudson Astronomical Association
