

## Exercise 5

The sales data below can be presented several ways – for example, by city, by product, or by a combination of the two.

	<b>Software Sales</b>			
	Kingston	Albany	Poughkeepsie	New Paltz
Word Processing	50000	55000	120000	16000
Spreadsheets	120000	173000	34000	38000
Database	51000	47000	49000	47000

Create three charts that are best suited to answer the following questions:

1. What percentage of the total revenue comes from each city?
2. How much revenue is produced by each city?
3. How much revenue does each product generate in each city?
