

MS Access Exercise 2

Open your database file from Exercise 1.

Create table: Products

Create the field names and their properties as you need them to store your specific data for products. You will have *at least* five products with their information included in your table.

Products Table Field Names:

ProductID (Primary Key: PID)

ProductName (PNAME)

UnitsInStock (INSTOCK)

UnitsOnOrder (ONORDER)

Weigth (WEIGHT)

UnitPrice (PRICE)

Create form: New Products

Create a form for the Products table. Include all fields in the form. Use the Form Wizard to create a form.

Create query: Out Of Stock

Create a query that displays all products which are currently out of stock.
