Homework 5

Create a “basic” web page in HTML format.
Print your web page twice: in HTML format view (for example, using Notepad for Windows) and as displayed by a Web browser (for example, using Mozilla Firefox)

Your web page should include:

- Comments
  - You will use comments to write your personal and general information (e.g. Your name, class number and section, date, etc).
- Text
  - Use more than one formatting tag.
  - Use different colors.
- Background
  - Use a tag to specify a color.
- Links
  - Have more than four links (e.g. email, other Web pages, etc)
- An unordered list
- Symbols
  - (e.g. a copyright symbol)
