Homework 6

Create a Web page in HTML format using notepad. Print your web page twice: in HTML format view (for example, using Notepad for Windows) and as displayed by a Web browser (for example, using Mozilla Firefox).

OPTIONAL:
In addition, after you create a Web page, try to “upload” your web page to your web space using the instructional support at http://www.newpaltz.edu/helpdesk/wwwspacs.htm.

Your Web page should include:

- **Comments**
  - You will use comments to write your personal and general information (e.g. Your name, class number and section, date, etc).
- **Links**
  - Have more than four links (e.g. email, other Web pages, etc)
- **At least two images**
- **At least two tables**
- **Text formatting tags** (Font, Color, Size, etc)
- **Text structuring tags** (Paragraph, Blockquote, etc)
- **Superscript/Subscript**
- **Lists** (unordered and ordered list)
- **Symbols** (e.g. a copyright symbol, non-breaking space, etc)
