

ASNY 2010 Spring Meeting Schedule Colgate University

All talks will be presented in 101 Ho Science Center

- 9:00am Reception and Coffee, outside Ho 101
- 10:00am Michal Simon – SUNY Stony Brook , invited talk
“Moving into the Beta Pic Moving Group”
- 10:45am Valerie Rapson – University of Rochester
“A Spitzer View of NGC 226”
- 11:00 am Coffee Break
- 11:15 am Neil Zimmerman – Columbia University
“High Contrast Studies of Nearby Stars with Project 1640”
- 11:30 am Thomas Sebring – Cornell University, invited talk
“The Cornell Caltech Atacma Telescope Project”
- 12:15 pm Lunch – Ho 329, 328, 332
Tour of Ho Tung Visualization Laboratory – Ho 401
- 1:15 pm Jenn Heldmann – NASA Ames Research Center, invited talk
“Lunar Impact! An Overview and First Science Results from NASA’s
Lunar Crater Observations and Sensing Satellite (LCROSS) Mission”
- 2:00 pm Aaron Jackson – SUNY Stony Brook
“Evaluating Systematic Dependencies of Type Ia Supernovae: The Influence of
Deflagration to Detonation Density”
- 2:15 pm Chris Malone – SUNY Stony Brook
“Convection in the Accreted Atmosphere of a Neutron Star”
- 2:30 pm Coffee break
- 2:45 pm Chris O’Dea – RIT
"Spitzer Observations of Seyfert Galaxies"
- 3:00 pm Michael Petersen – Colgate University
“Detection of Anomalous Accretion-like Outbursts from the DQ Tau Young
Binary System”
- 3:15 pm Stefi Baum – RIT
Discussion of New York State Telescope Initiative
- 4:00 pm Adjourn
